Gantt Chart for QuickBase

Manage your Projects Visually

Highlights of Gantt Chart for QuickBase

- ✓ **Customize what you see…**
    - o Search for projects based upon Project name, Start date, End date and User
    - o Filtering criteria can be used in QuickBase to display projects for a specific user, and for a specific start date/end date
    - o Available in 3 different views - Week, Month and Year
    - o Can be made visible in different "skins"
    - o Tooltips for Project and Task can be configured separately - up to 10 fields can be displayed on a tooltip from the Projects and Tasks table

- ✓ **Reschedule tasks…**
    - o Tasks can be added /updated/deleted from the Gantt chart. Task's start date/end date can be changed by sliding the task from within the Gantt chart. Task details get updated in QuickBase immediately...

- ✓ **Set Dependencies…**
    - o Task dependencies can be added by simple drawing a line between two tasks. If you reschedule a task, its dependent tasks automatically reschedule themselves as needed

- ✓ **Export your chart…**
    - o Convert to PDF and print

- ✓ **Additionally…**
    - o Task details, i.e. Task name, Start date, End date, Priority, Status, Percent complete, User, Milestone and Notes can be edited from a task editor window
    - o Can require a user to login with his/her QuickBase credentials to view/edit details of the project/tasks displaying only projects assigned to the user
    - o A Task record can be viewed from QuickBase with a double-click
    - o Can be rendered on devices with different screen size - appearance and structure remain the same across devices
